

SPINABOOTH

MORE THAN JUST A PHOTOBOOTH

TAKE YOUR SELFIE TO A NEW DIMENSION WITH SPINABOOTH

Celebrations are a vital part of our culture – from weddings to birthdays and even conventions or large-scale events – a planner is behind the scenes pulling all the strings.

In recent years, photobooths have become staple attractions at all kinds of events. In fact, a good photobooth makes it to the primary social media feed most of the time. Unfortunately, many of these photos are from one angle and lack the luster of candid shots.

Spinabooth is an innovative product that changes the dimension of your photobooth experience. Participants stand on a stationary platform while a metal arm rotates around the base. Our accessories are capable of holding iPads, GoPros, and smartphones – for an all-encompassing selfie experience.

SPINABOOTH SPECIFICATIONS

Spinabooth comes in four **sizes** – **27"** (1-2 people), **31"** (2-3 people), **40"** (3-4 people), and **45"** (5-6 people). The sturdy base makes it possible for singles, couples, and even small groups to create a unique photobooth experience on a 360-degree level with the rotating motion arm.

THE MARKET FOR SPINABOOTH

To stand out in this industry, which has seen a 9.8% decline over the last five years, planners and coordinators need to have an innovative advantage over the competition. Spinabooth takes the traditional selfie and makes it better. Instead of flat one-dimensional imagery, Spinabooth adds layers of dimension that can be used over and over at party after party.

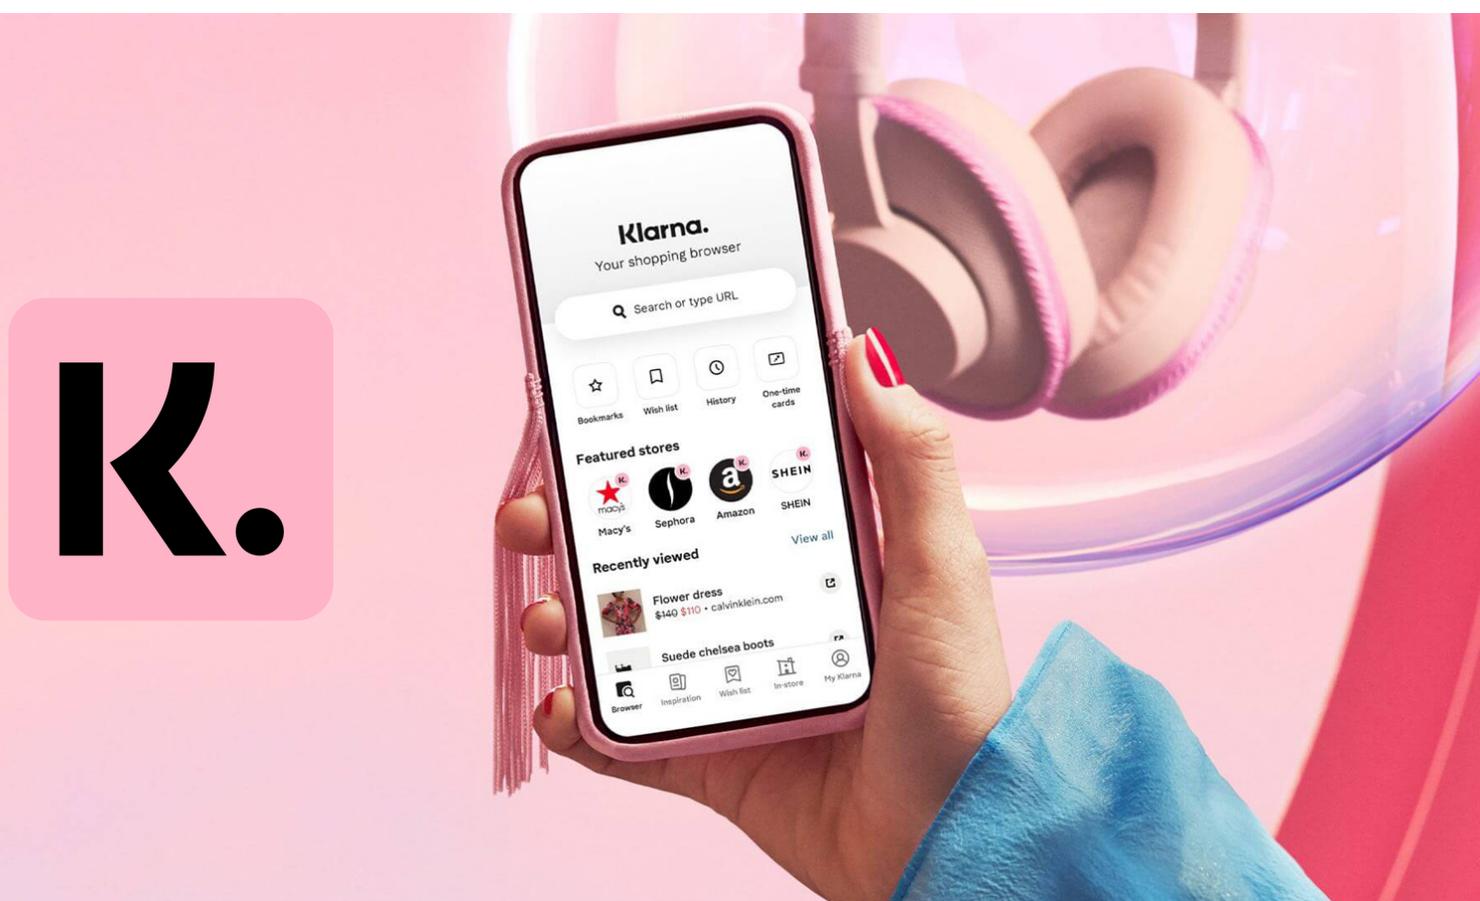

The party planning and event industry market size in the United States is expected to reach \$3.2 billion in 2022. The largest areas of growth opportunities in the market are the higher thresholds of corporate revenue, giving businesses to spend money on events such as holiday parties, company picnics, and other social events that require professional planning. (IBISWorld)

According to the US Bureau of Labor Statistics, the employment of meeting, convention, and event planners is projected to grow by 18% from 2020-2030. The projected job openings for this industry per year are estimated at 16,400 annually. (USBLS)
